

Stop stigmatization! Stop Influencers!

Mankind does not suffer from Influenza, mankind suffers from influencers!

75 years after the end of the Second World War,
75 years after the closure of extermination camps,
75 years after certain population groups were excluded,
75 years after a inhumane regime has imprisoned the world in fear,
75 years after otherwise thinking or fellow human beings belonging to another breed have been stigmatized,
the world is on the eve of a new form of stigmatization!

If it is up to the current WHO, politicians and pharmacy, then,
people who are unwilling to dance to their will, again:

1. are obliged to wear a mark
2. are excluded from social rights
3. are considered to be inferior
4. are denied free access to food
5. are denied free access to events
6. are deprived of the right to free expression
7. are forced to mandatory vaccination
8. are forced to use an app
9. are stigmatized again

It can never be the intention in a democracy
to use arbitrary arguments such as human health as an argument for:

1. forcing people to wear a mark
2. excluding people from social rights
3. considering humans inferior
4. denying people free access to food
5. denying people free access to events
6. deprive people of their right to freedom of expression
7. require people to compulsory vaccination
8. forcing people to use an app
9. stigmatize humans

We stand together for the decision
the choice for good or evil,
a nation that surrenders to tyrants,
will lose more than body and property,
then extinguish the light!

H.M. van Randwijk

Stop stigmatization! Stop Influencers!

Mankind does not suffer from Influenza, mankind suffers from influencers!

Decision making in a democracy should never be based on the advice of lobbyists, influencers or otherwise interested parties! Only independent advice from independent experts can and may lead those in power to take fair measures and create laws of integrity. Anything else is an unlawful conflict of interest and corrupt!

Bill Gates is not a medical specialist but a businessman and has invested 10,000,000,000 in the pharmaceutical industry and called it his best investment ever. Bill Gates is a sponsor of the World Health Organization and their most influential influencer. The WHO is considering governments. Governments therefore decide to take action based on the opinion of a non-expert interested party! That's a conflict of interest!

Stop stigmatization! Stop Influencers!

Mankind does not suffer from Influenza, mankind suffers from influencers!
